

FILE-TRANSFER · PHASE 2

Mockups and design tokens

At any moment, the user knows who is connected, where their transfer stands and what they can do next.

SCREENS

5 screens + join approval · 20 frames

THEMES

Light and dark token sets

TYPE

Bricolage Grotesque · Figtree · JetBrains Mono

WIDTHS

375 px and 1280 px

ACCESSIBILITY

WCAG AA contrast · 44 px touch targets

ACCENT

Sea green #0B7A6E / #DDF3EE

Proposal by Willy Fonkou Kamte · for PM validation before any screen code (sprint 7).

File Transfer — design tokens

Warm and rounded in shape, precise and technical for numbers. Accent: sea green. Every token exists in light and dark.

Colours

Semantic tokens: components only ever use these names, never a raw value. Every text/background pair passes WCAG AA (4.5:1; 3:1 for control borders).

Light theme		measured contrast	
	--color-bg Page background	#F7F5F0	15.3:1
	--color-surface Cards, navbar	#FFFFFF	16.6:1
	--color-surface-sunken Inputs, recessed areas	#EFEBE3	5.4:1
	--color-border Dividers	#E3DED4	
	--color-border-strong Control borders	#8F887B	3.5:1
	--color-text Primary text	#17201E	16.6:1
	--color-text-muted Secondary text	#56615D	6.4:1
	--color-primary Primary action, progress	#0B7A6E	5.2:1
	--color-primary-soft Sea-green tint	#DDF3EE	6.6:1
	--color-warning Waiting, reconnecting	#9A5B00	5.4:1
	--color-danger Error, delete	#B83A28	5.7:1

Dark theme		measured contrast	
	--color-bg Page background	#0F1413	16.1:1
	--color-surface Cards, navbar	#171D1C	14.8:1
	--color-surface-sunken Inputs, recessed areas	#0B0F0E	7.7:1
	--color-border Dividers	#27302E	
	--color-border-strong Control borders	#5E6B67	3.1:1
	--color-text Primary text	#EAF0EE	14.8:1
	--color-text-muted Secondary text	#9AA7A3	6.9:1
	--color-primary Primary action, progress	#45D1BD	8.8:1
	--color-primary-soft Sea-green tint	#133A35	8.6:1
	--color-warning Waiting, reconnecting	#F0B454	9.2:1
	--color-danger Error, delete	#FF8A73	7.4:1

Typography

Bricolage Grotesque for headings (warm), Figtree for body text (legible, rounded), JetBrains Mono for the session code and data (precise).

--text-display-xl	52 / 1.1	Hero heading
--text-display-lg	32 / 1.15	Page title
--text-title	20 / 1.2	Card title
--text-body	16 / 1.5	Body text, buttons
--text-small	14 / 1.45	Metadata, hints
--text-code	64 / 1	482 913
--text-data	17 / 1.3	12.4 MB/s · 46 / 200

Spacing

4 px scale. Between items of one group: 8–12; between groups: 24–32.

--space-1	--space-2	--space-3	--space-4	--space-5	--space-6	--space-7	--space-8
4px	8px	12px	16px	24px	32px	48px	64px

Radii

Everything is rounded; the bigger the element, the bigger its radius.

--radius-sm	--radius-md	--radius-lg	--radius-xl	--radius-full
8px · Badges	12px · Inputs, icons	20px · File rows	28px · Cards	999px · Buttons, pills

Core components

Every touch target is at least 44 px tall.

Home

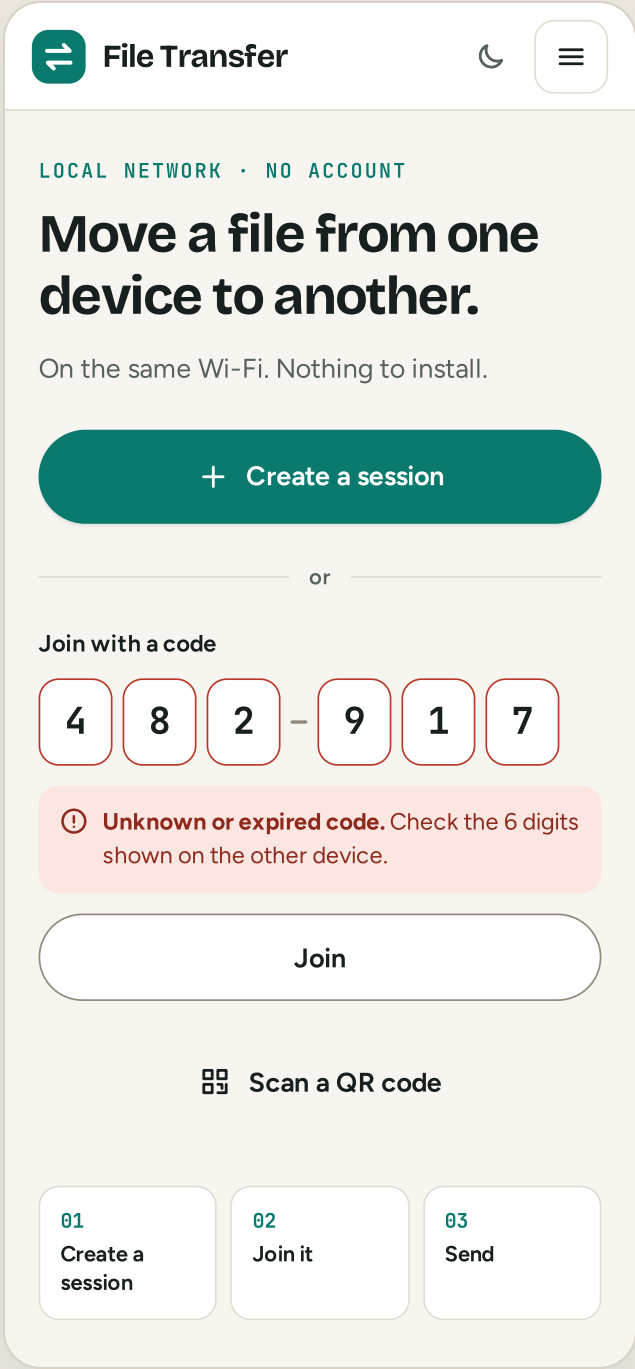

One decision: create a session or join one. The code field is visible straight away, with no extra screen. The navbar adds theme and language.

1 • Home — desktop

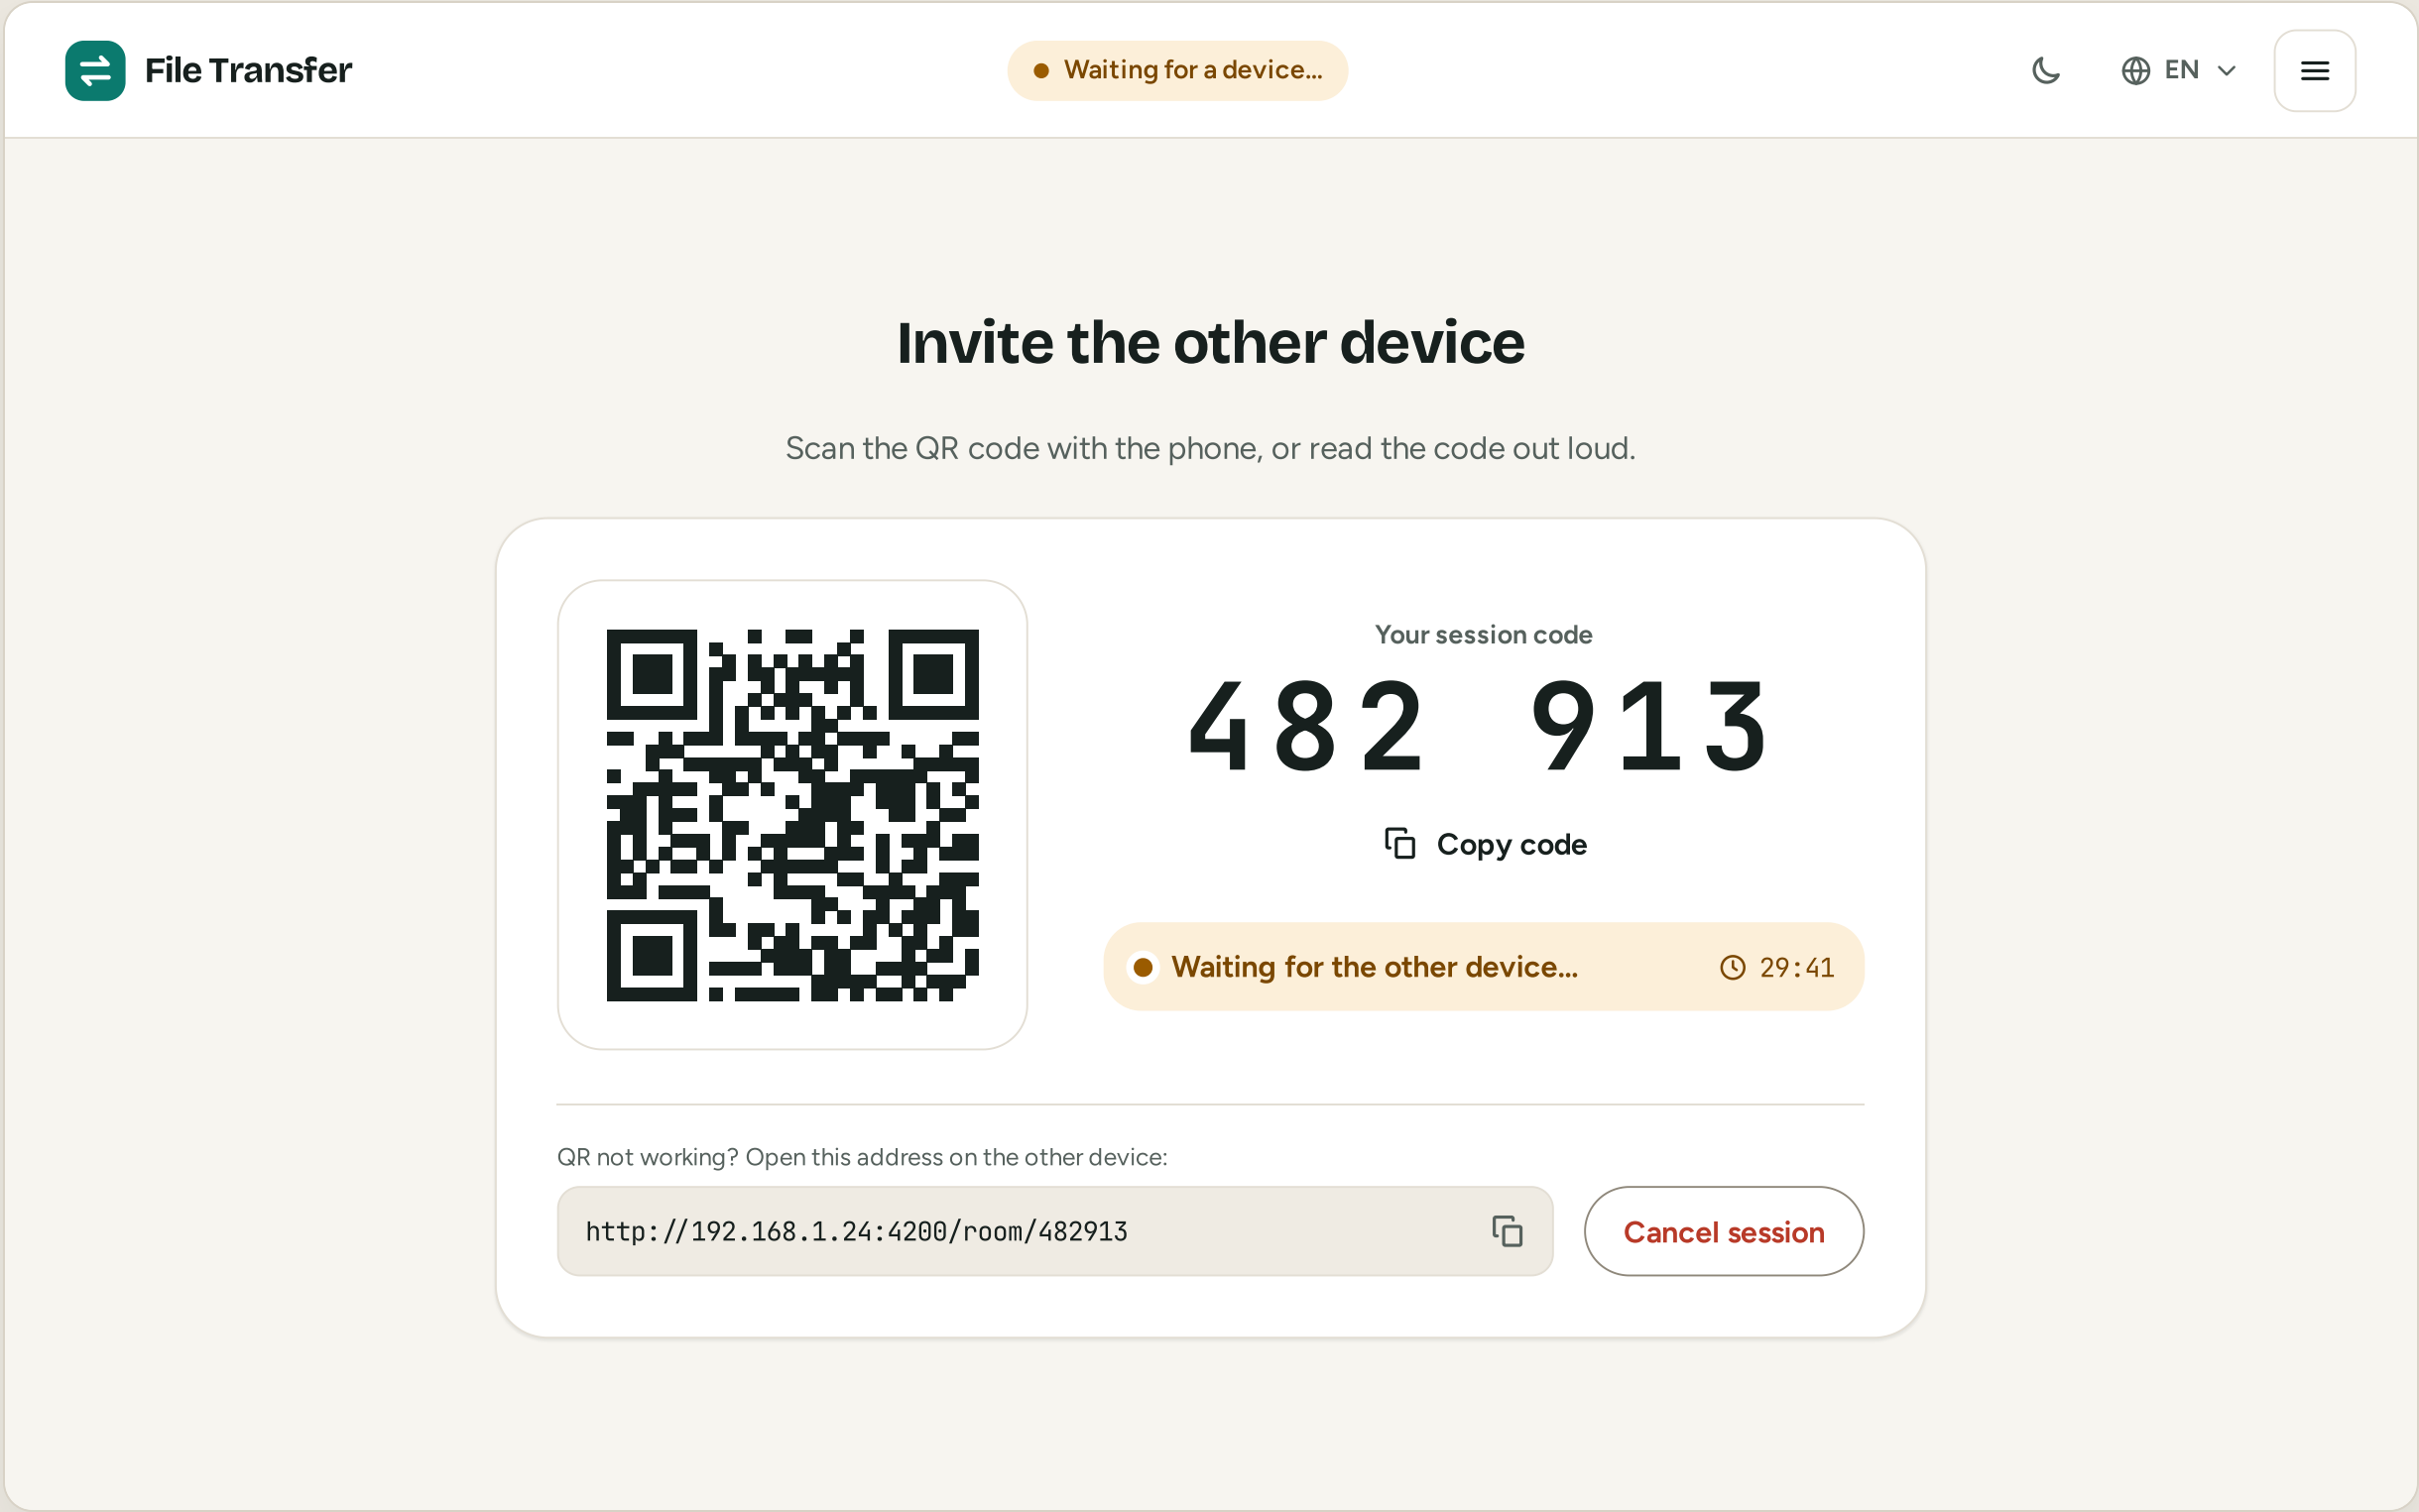

1 • Home — mobile

1 • Home — mobile • invalid code

Waiting for a device

The code dominates the screen: read from a distance, spoken aloud or scanned. The LAN address stays as a fallback when the QR fails.

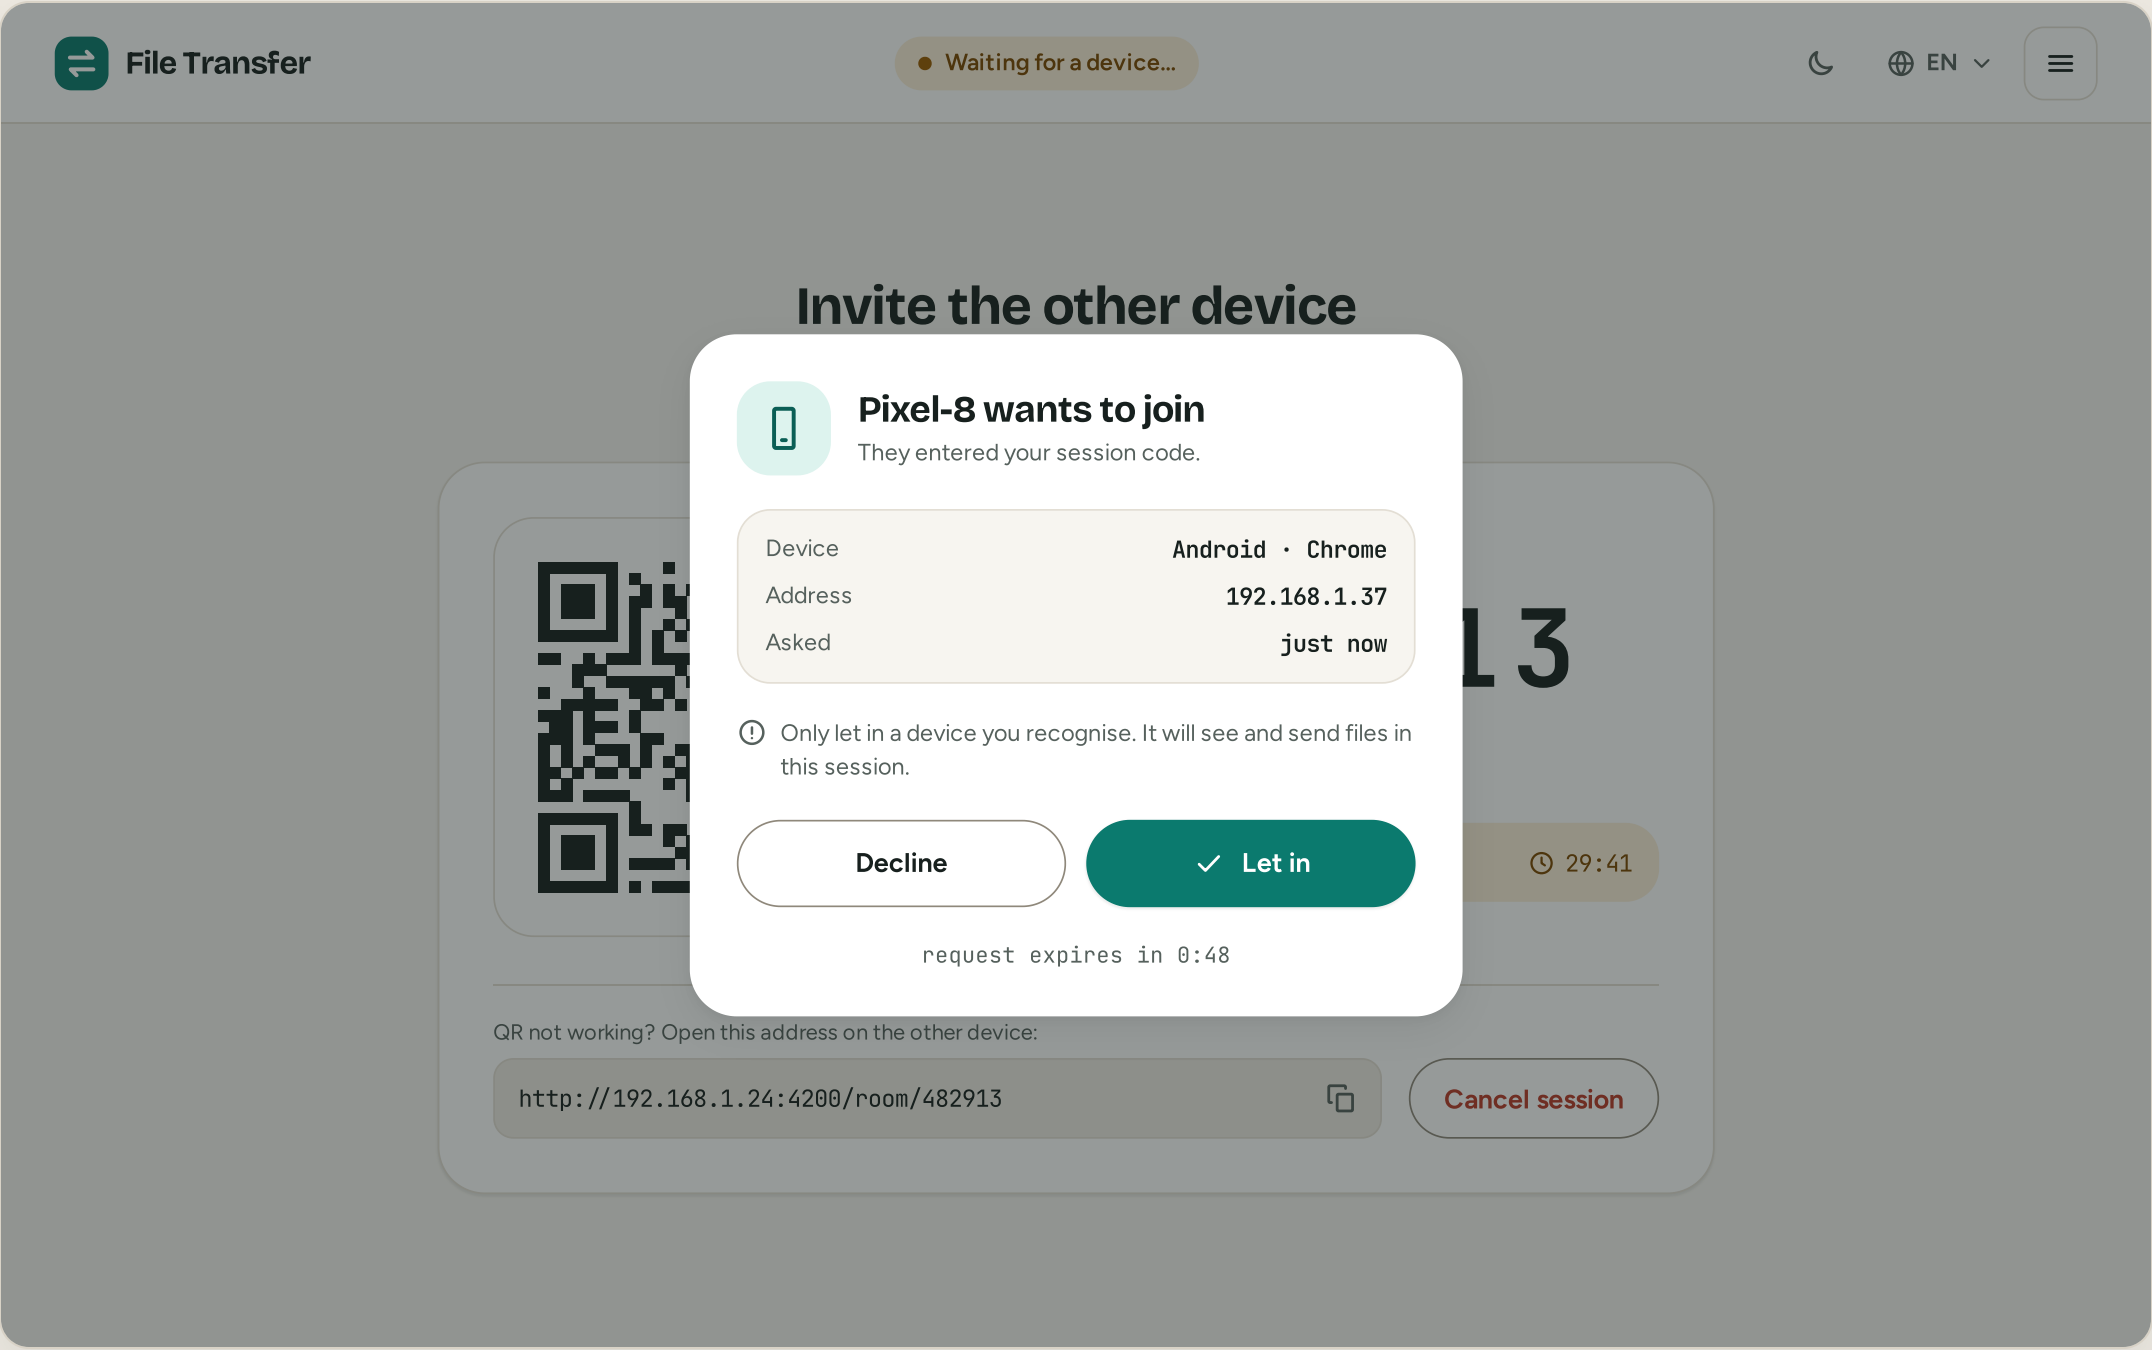

2 · Waiting for a device — desktop

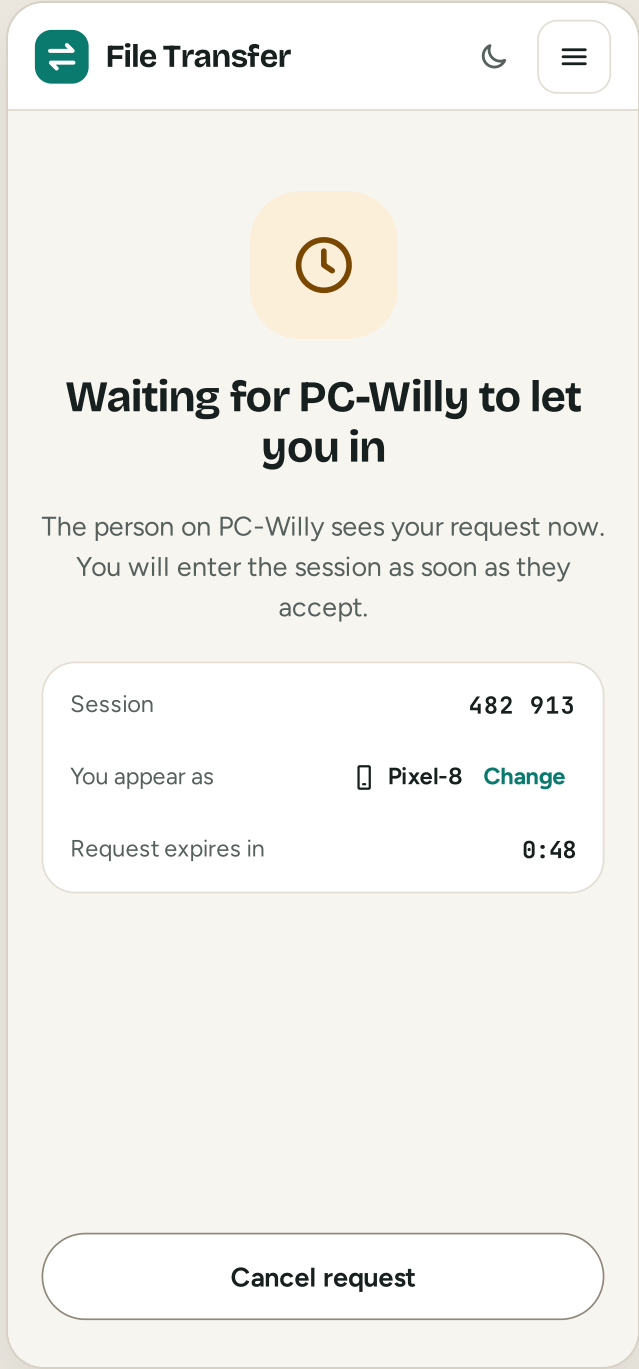

2 · Waiting for a device — mobile

The host lets the other device in

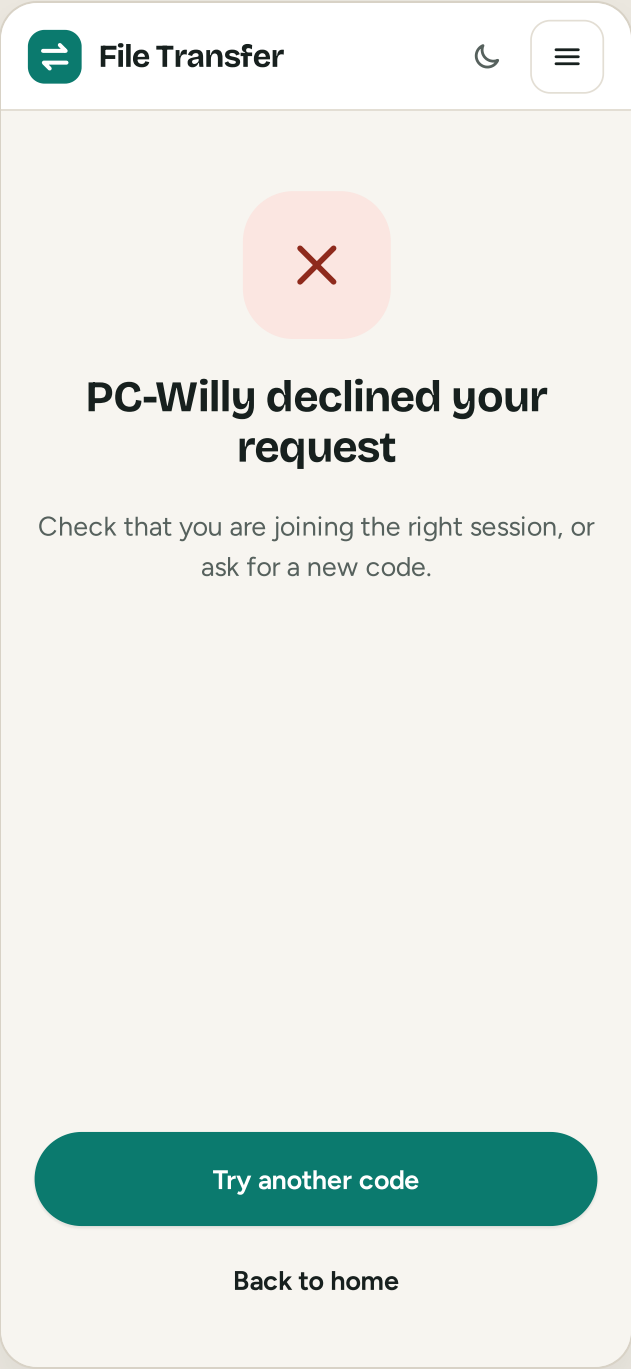

2 · Join request — host (desktop)

Knowing the code is not enough: the host sees who is asking and accepts or declines. The joining phone waits, then enters or is told why it cannot.

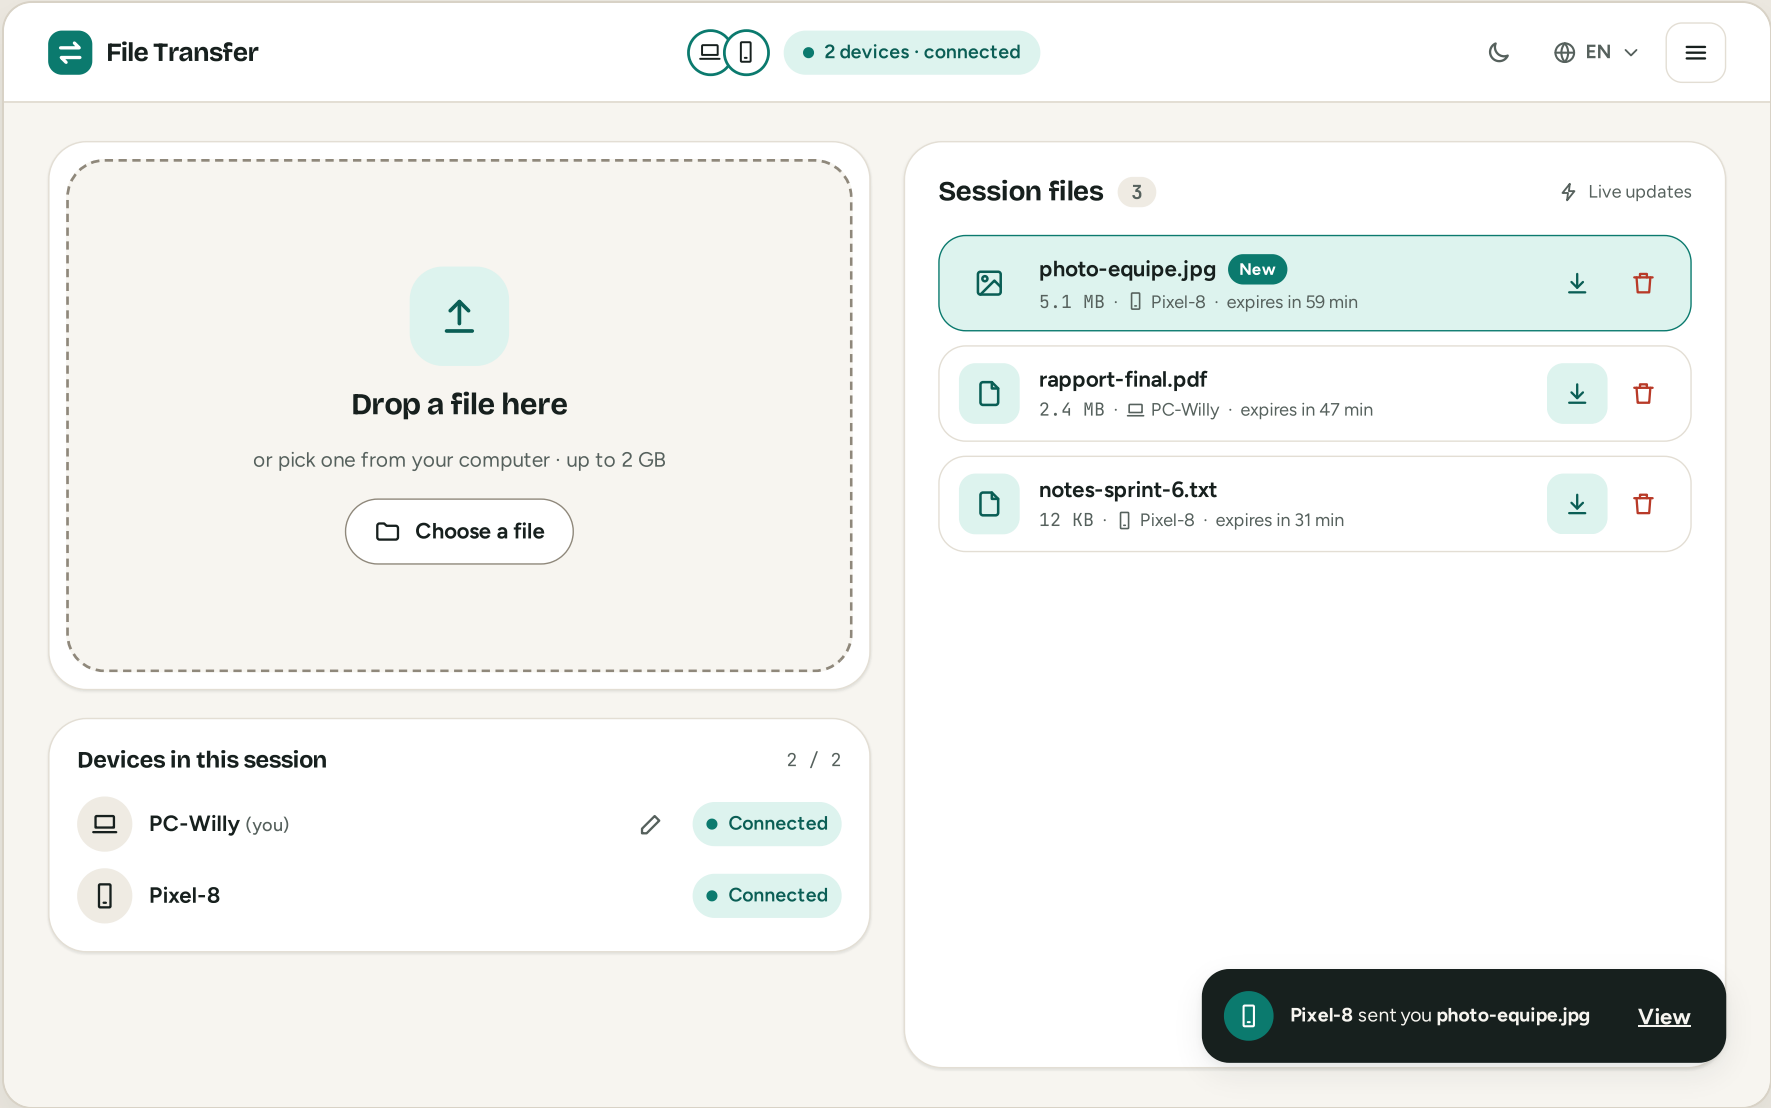

2 · Join request — waiting for approval (joining phone)

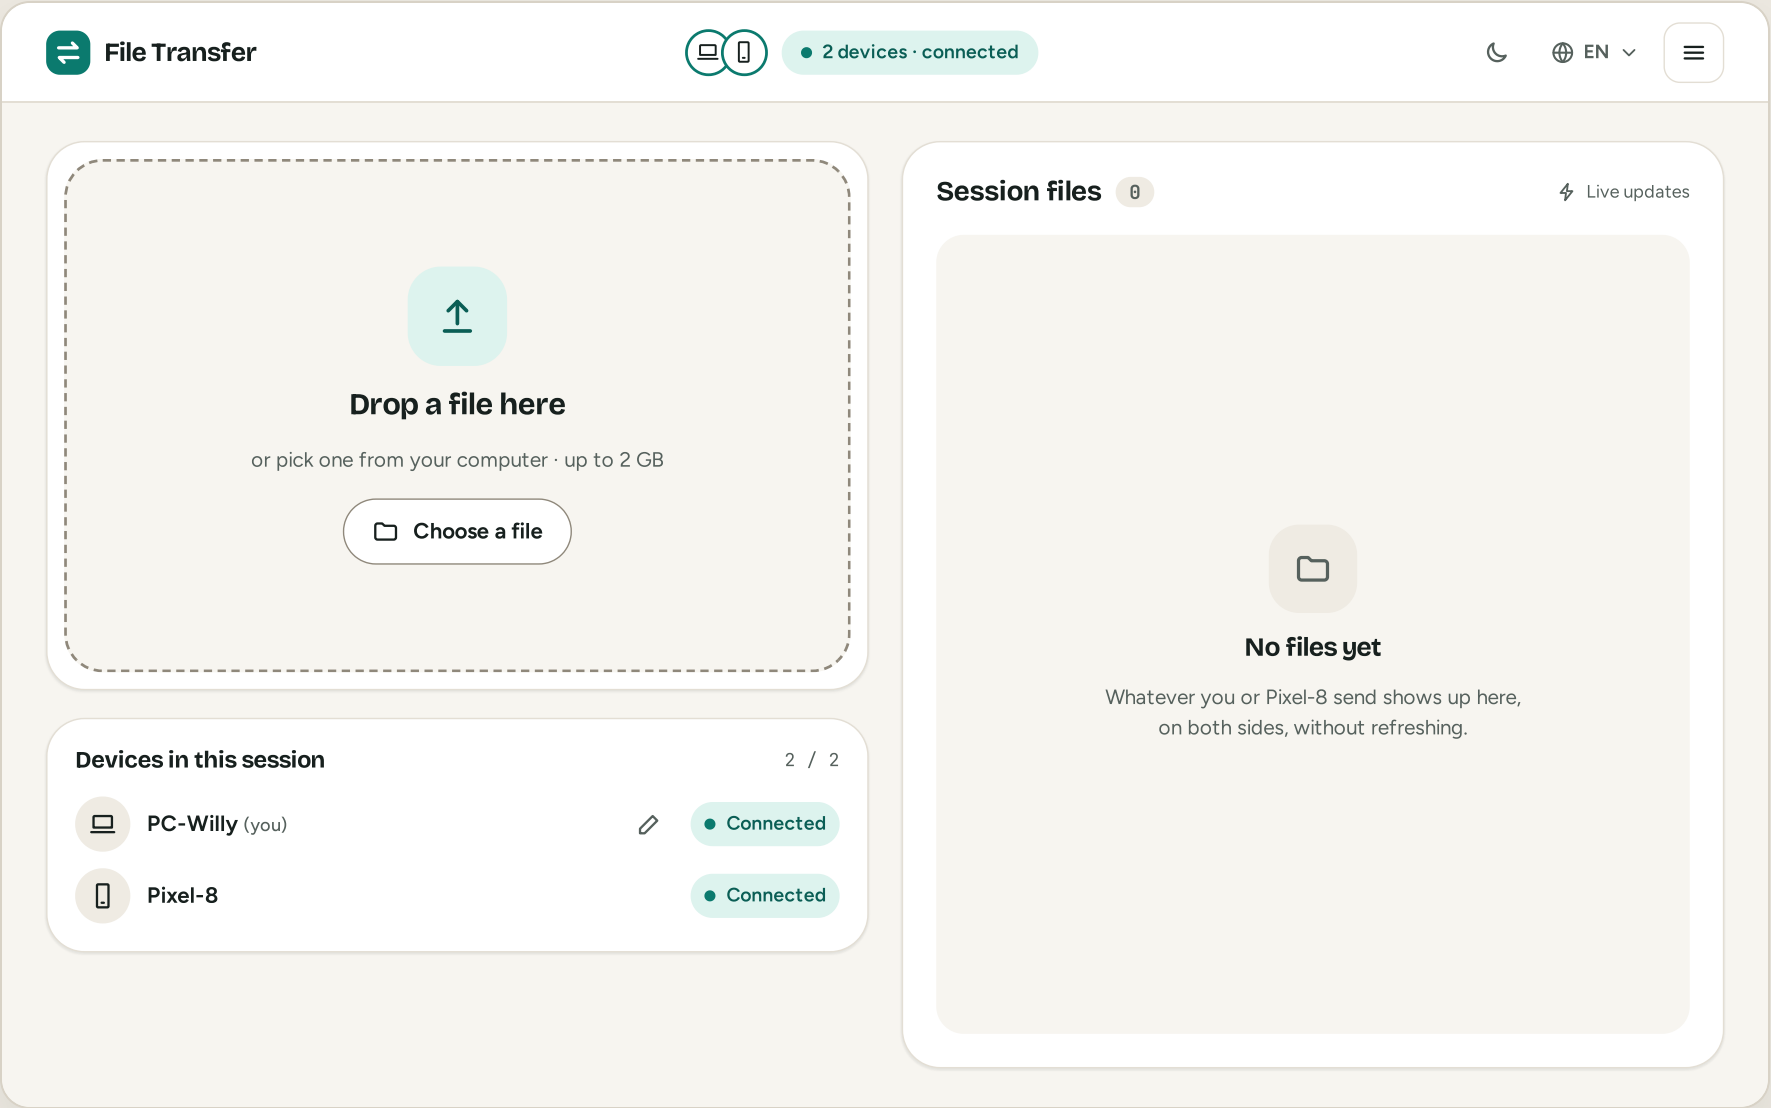

2 · Join request — declined (joining phone)

Active room

One screen replaces Send and Receive. The navbar stays light: both devices and their status. A toast announces every incoming file.

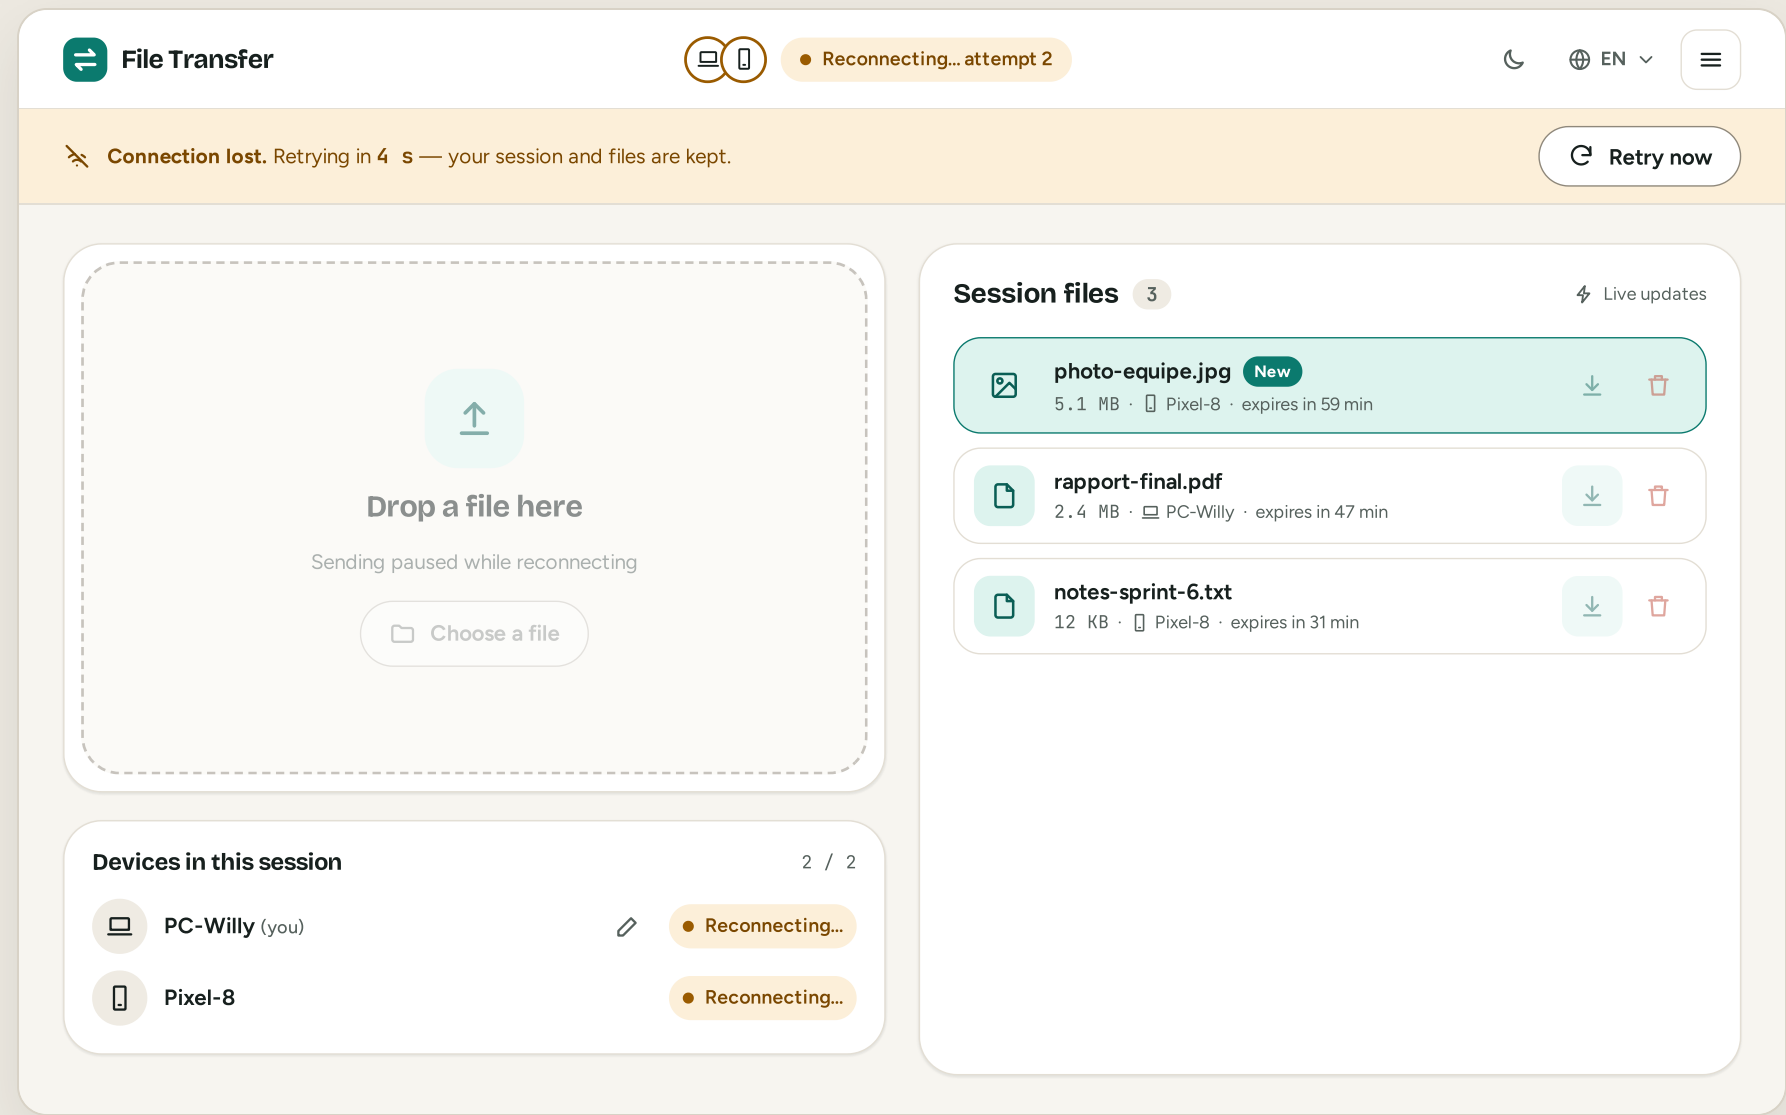

3 · Active room — desktop

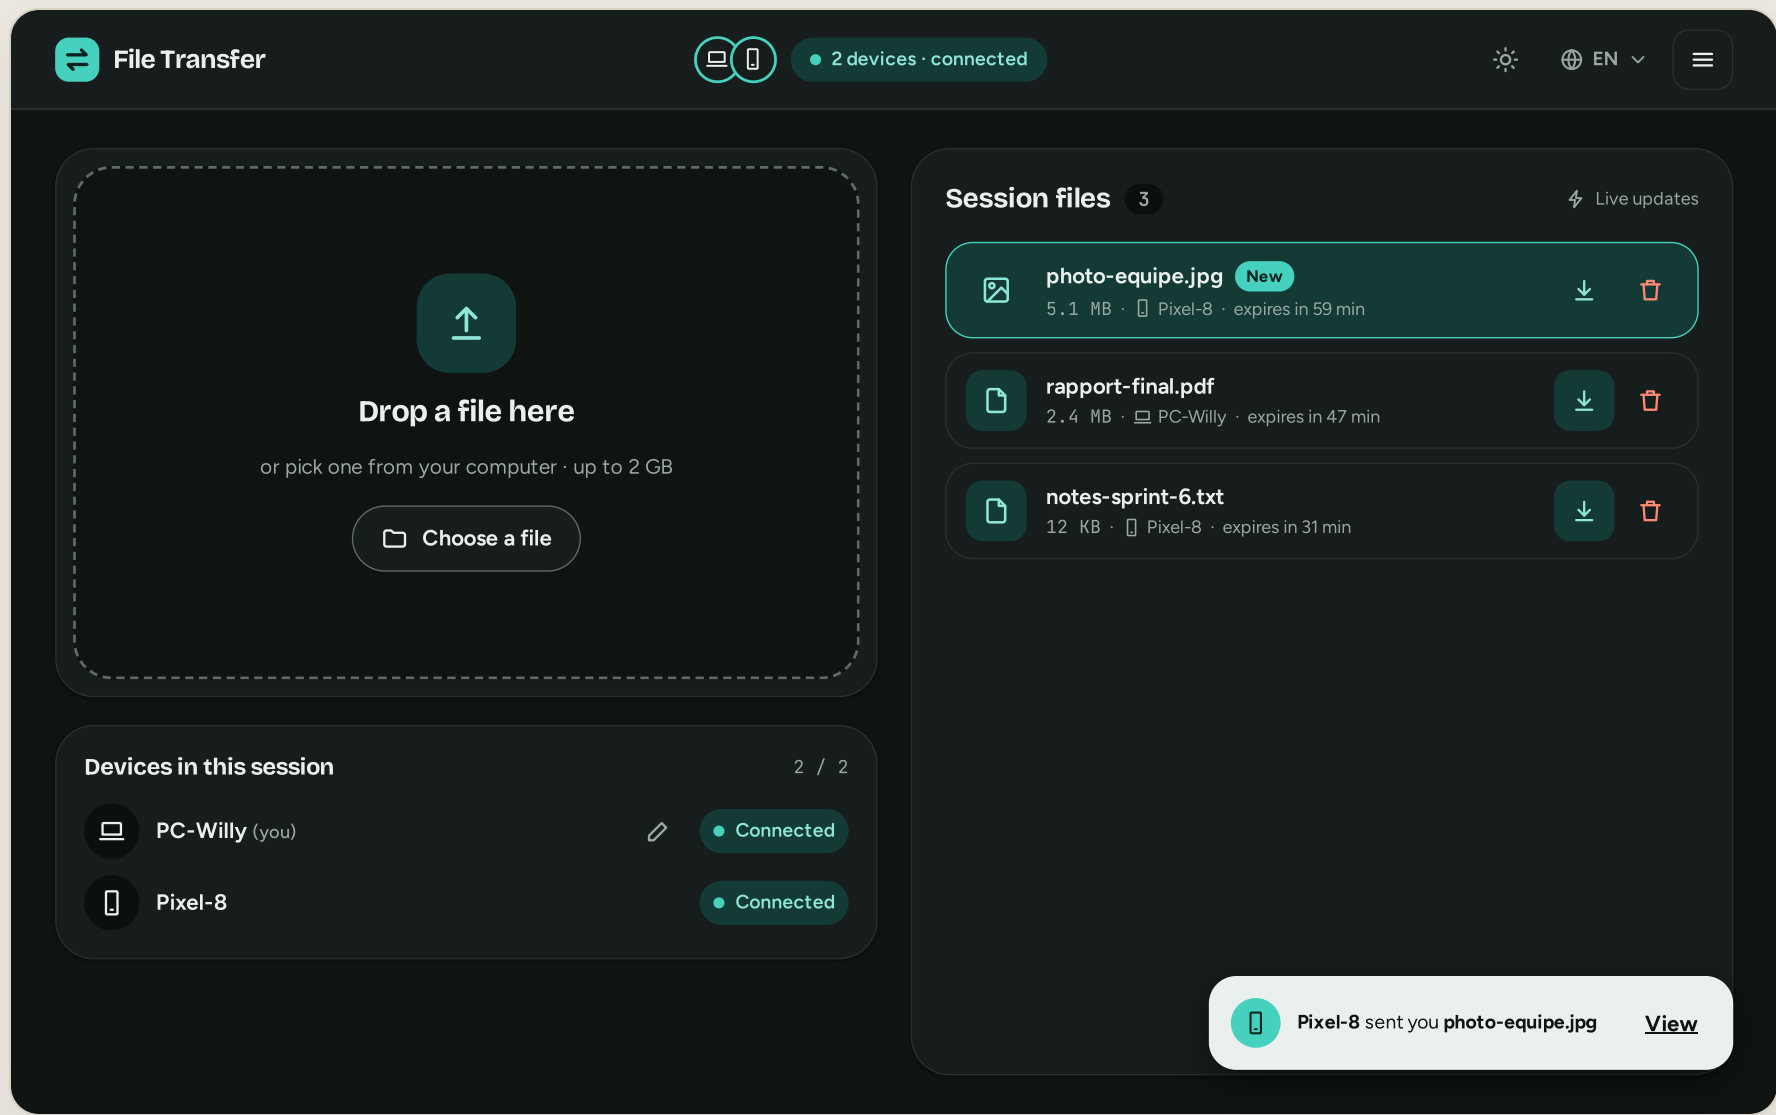

3 · Active room — empty state

Reconnecting and dark theme

3 · Active room — reconnecting

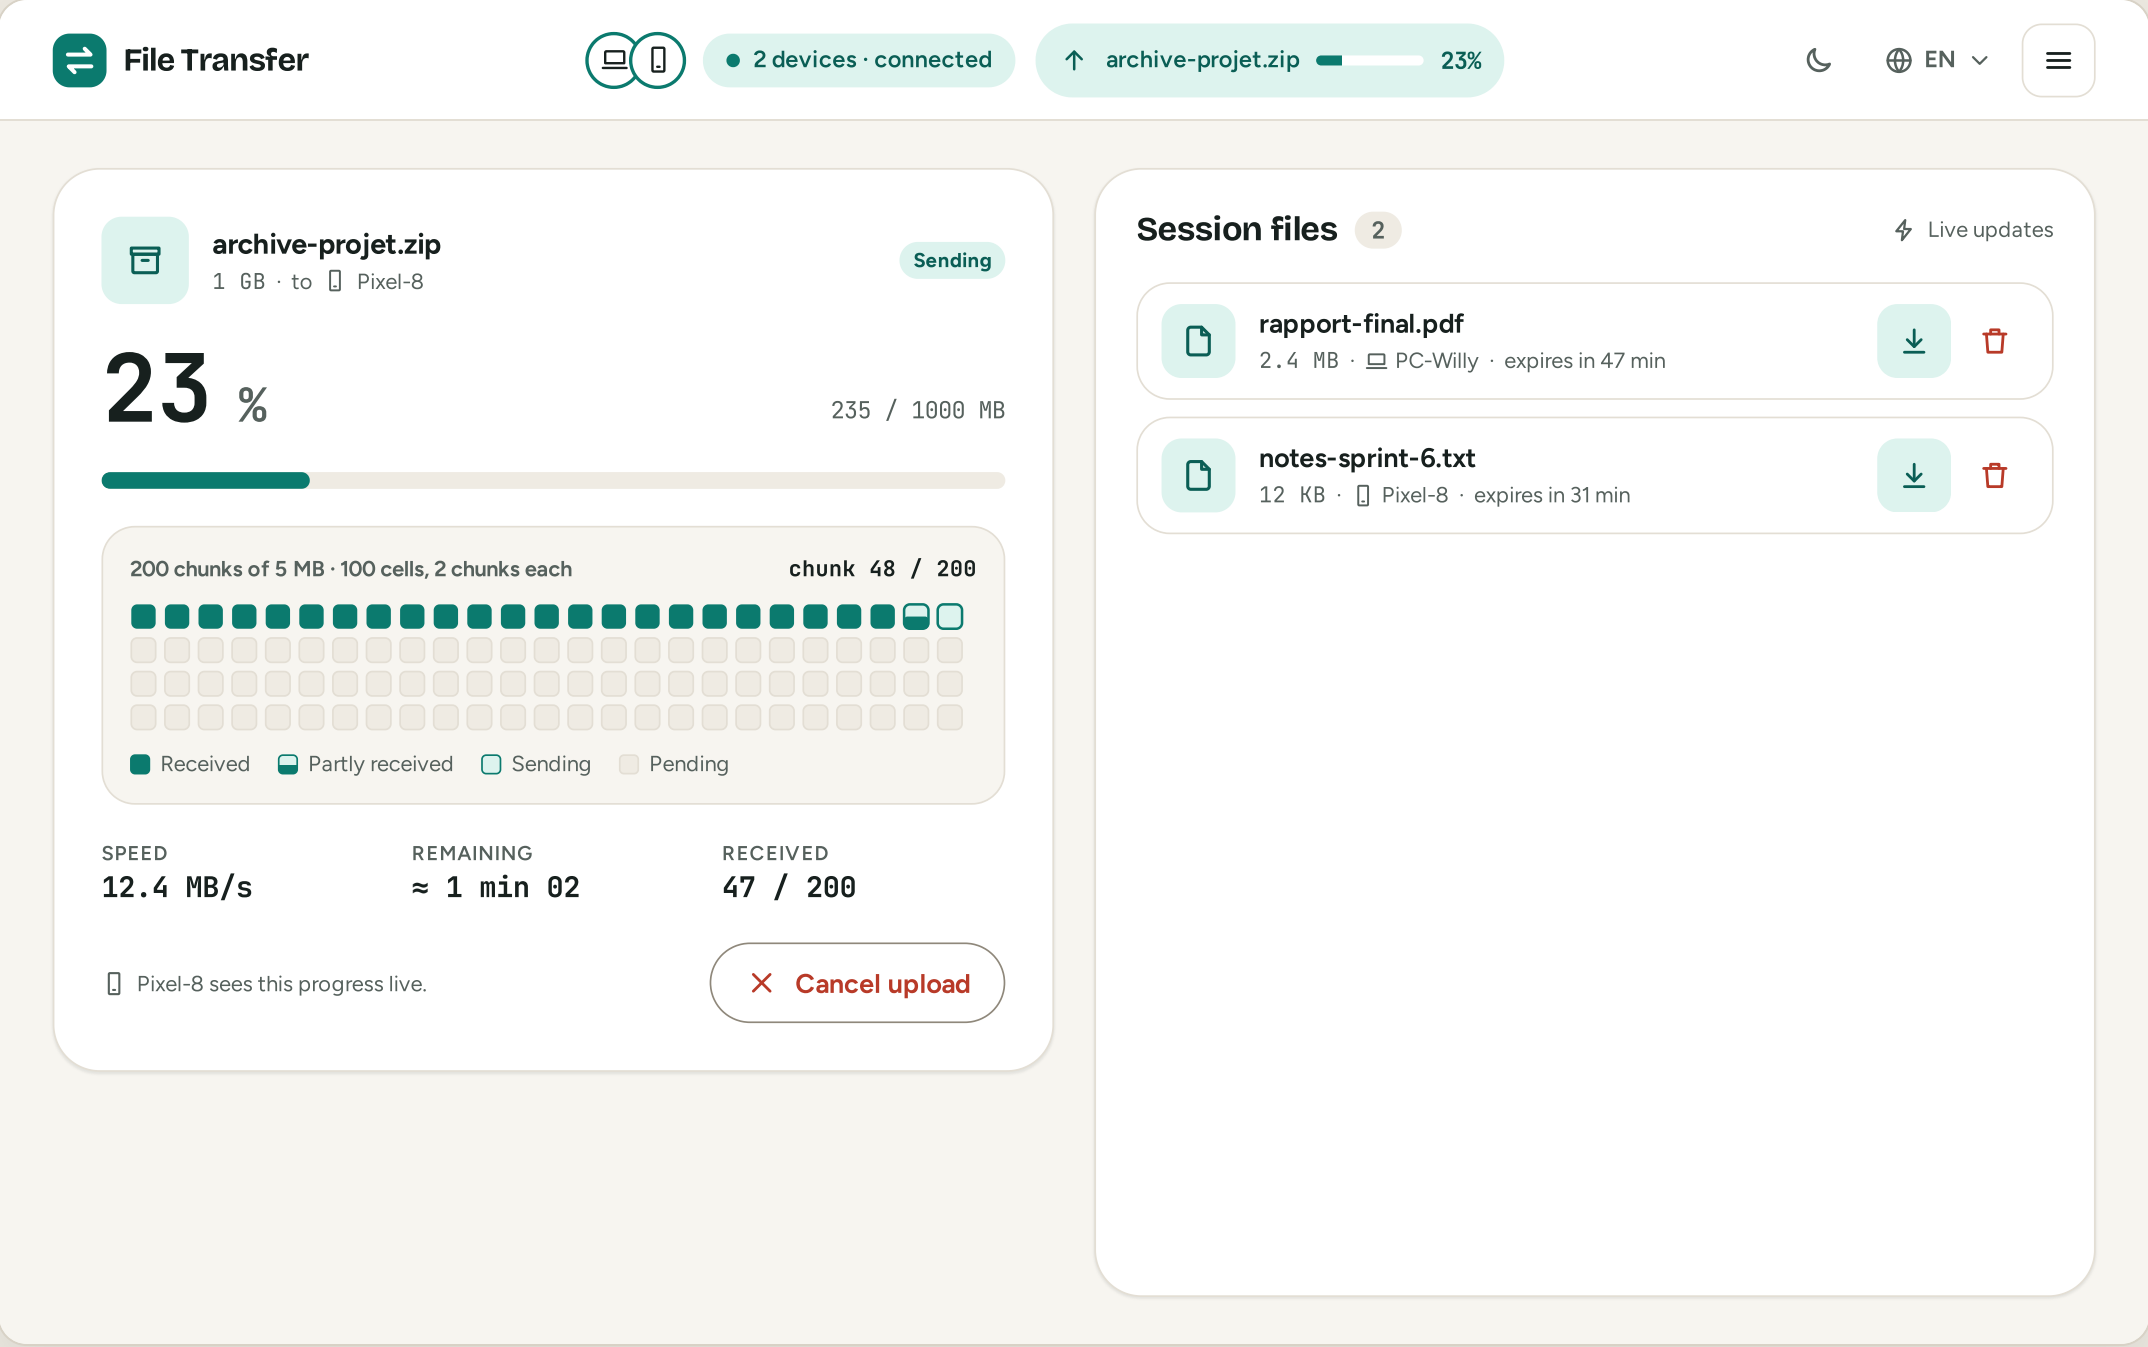

Connection lost: a banner explains what happens and sending pauses, the files stay. The dark theme validates the second token set.

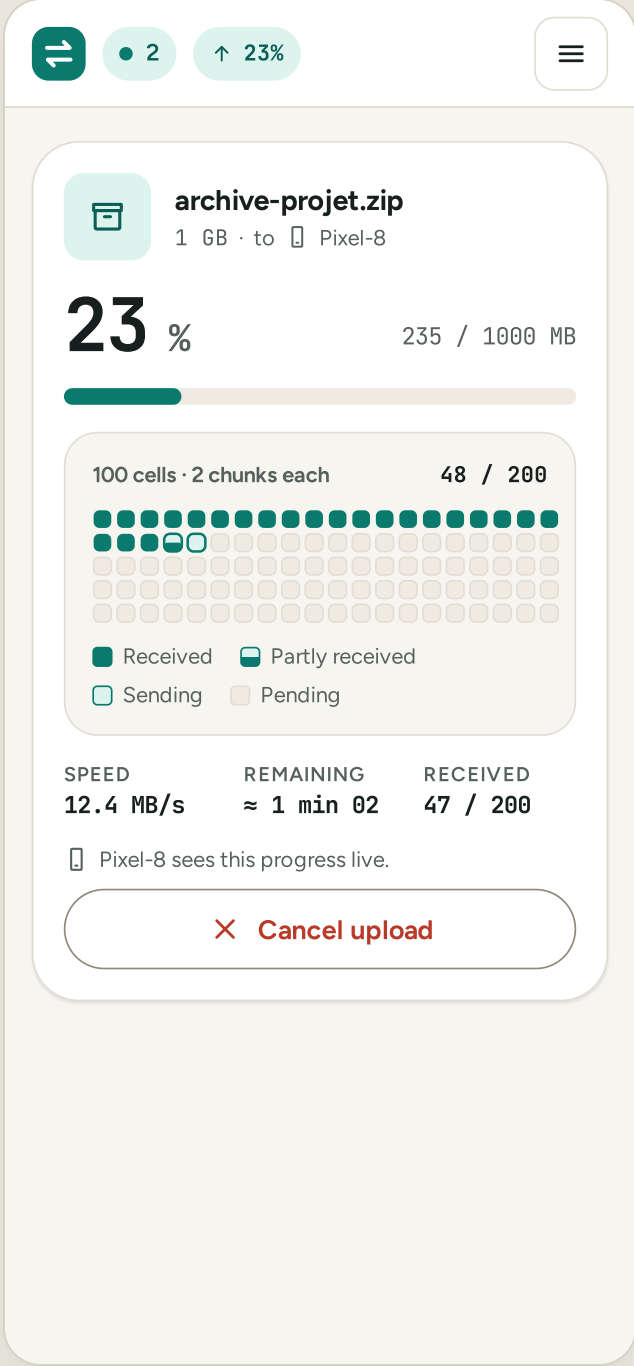

3 · Active room — dark theme

Transfer in progress

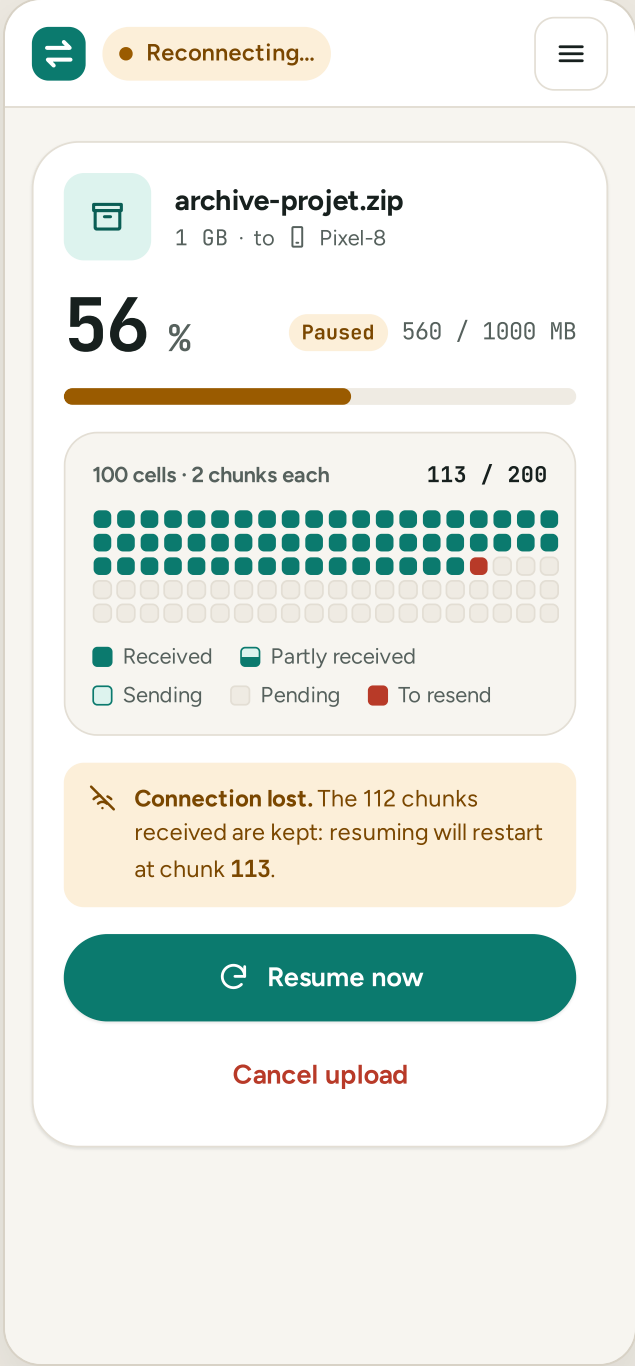

A fixed grid of 100 cells, whatever the file size. Each cell fills up as its chunks arrive; a red cell marks where the upload will resume.

4 · Transfer in progress — desktop

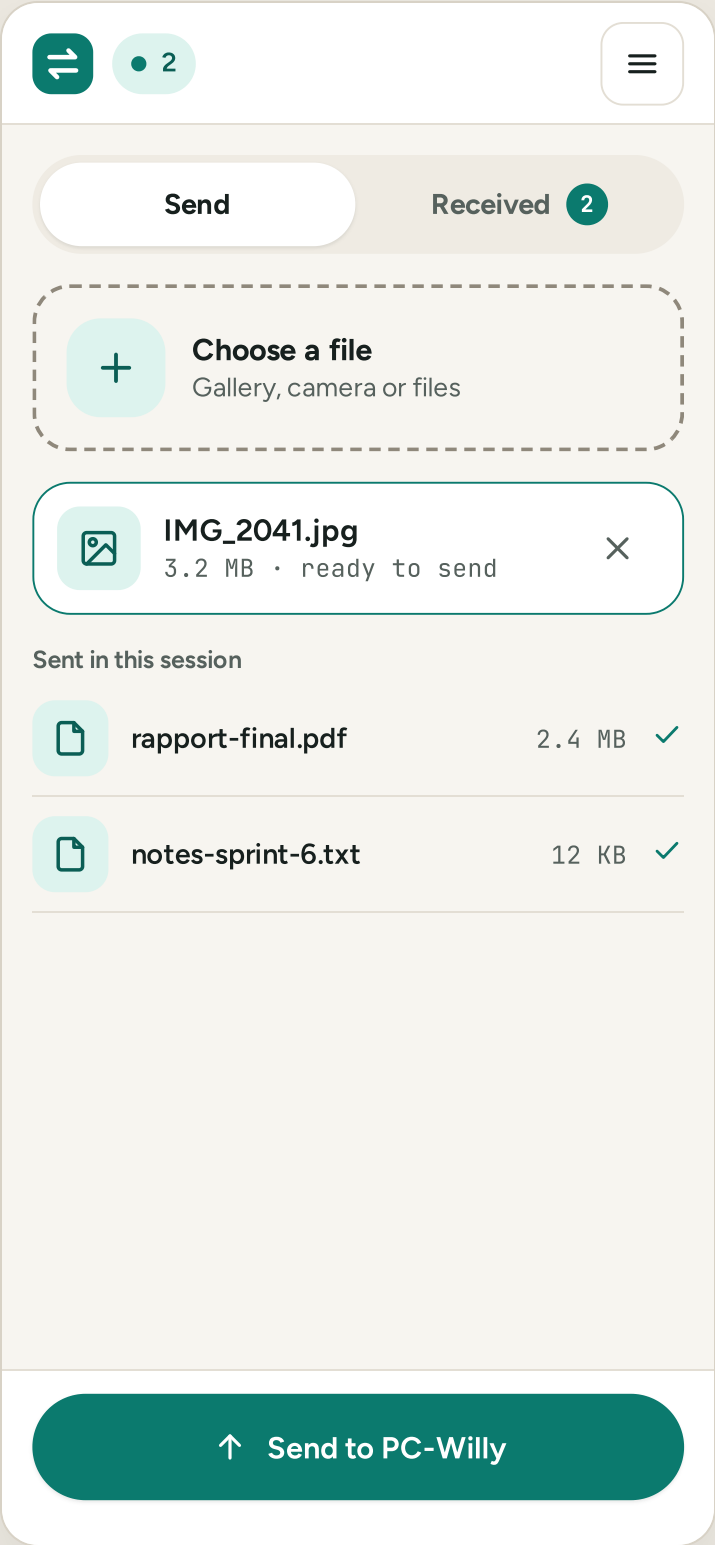

4 · Transfer in progress — mobile

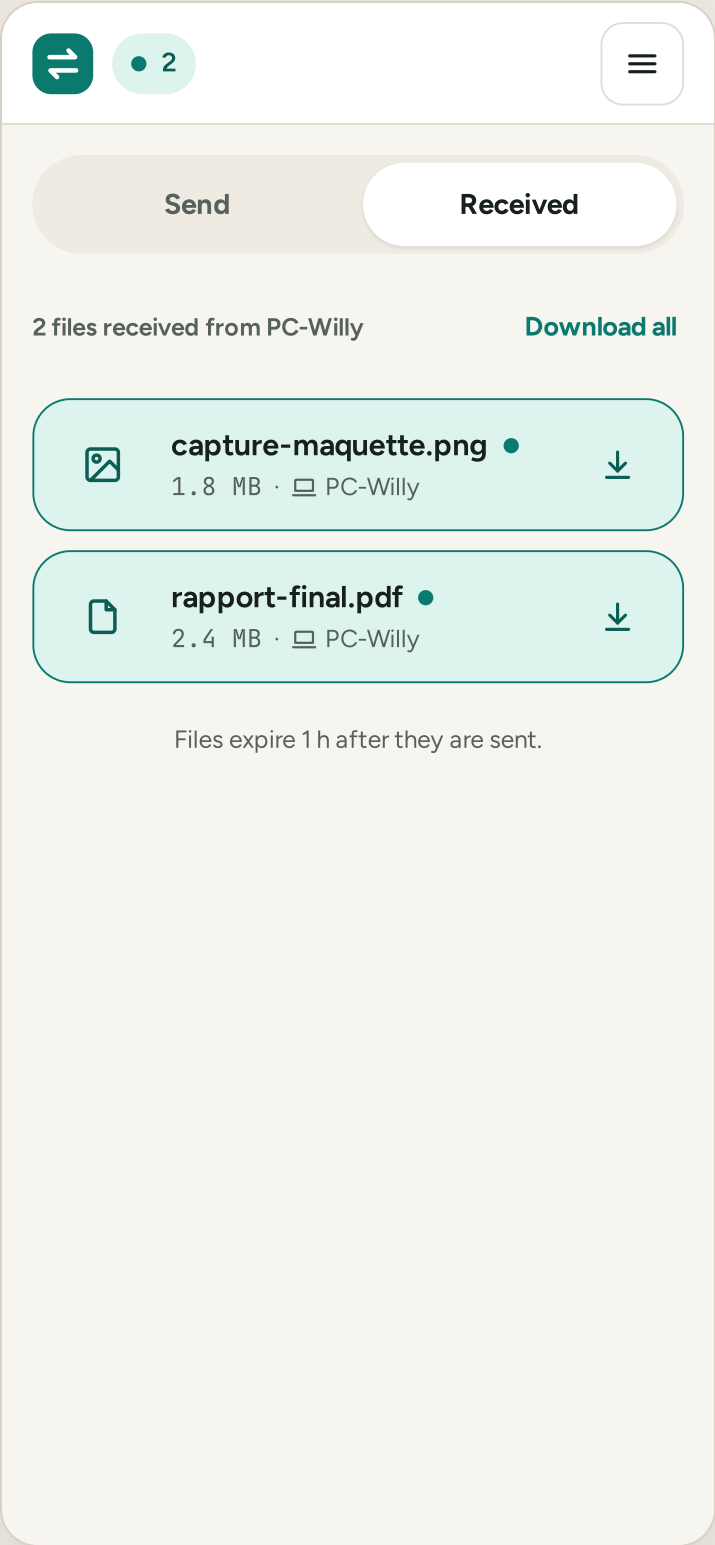

4 · Transfer — mobile · interrupted and resumed

Mobile room

The only screen where Send and Received split into tabs, because height runs out. The badge on Received counts new files.

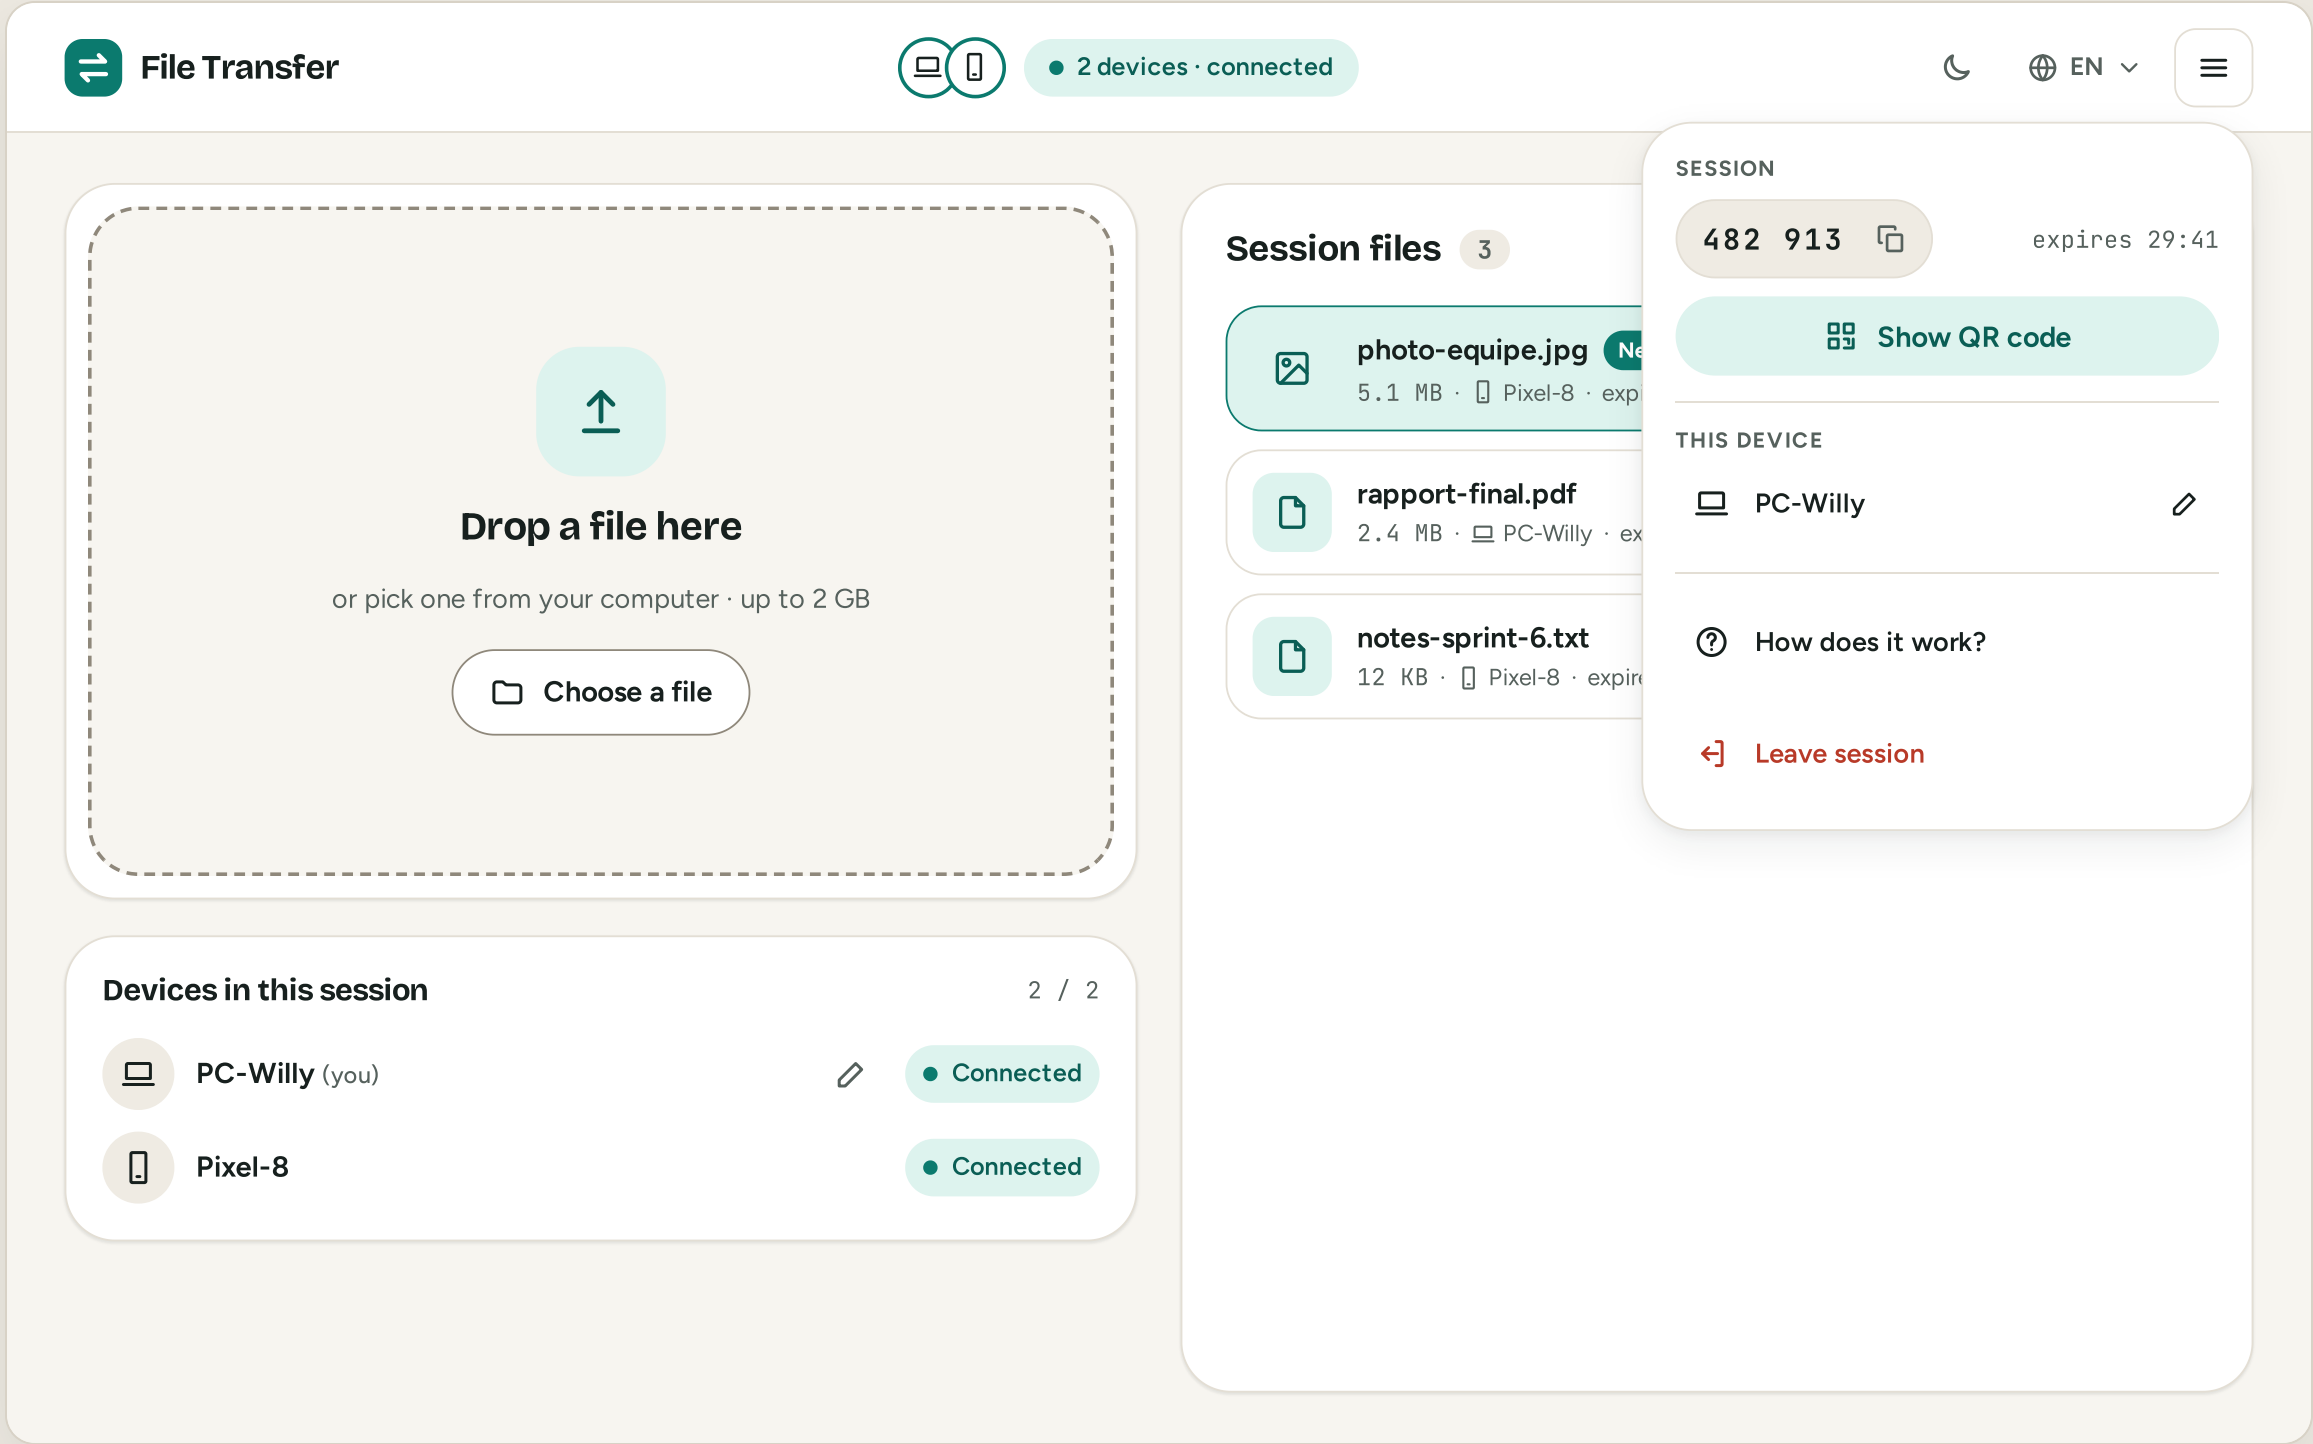

5 · Mobile room — Send tab

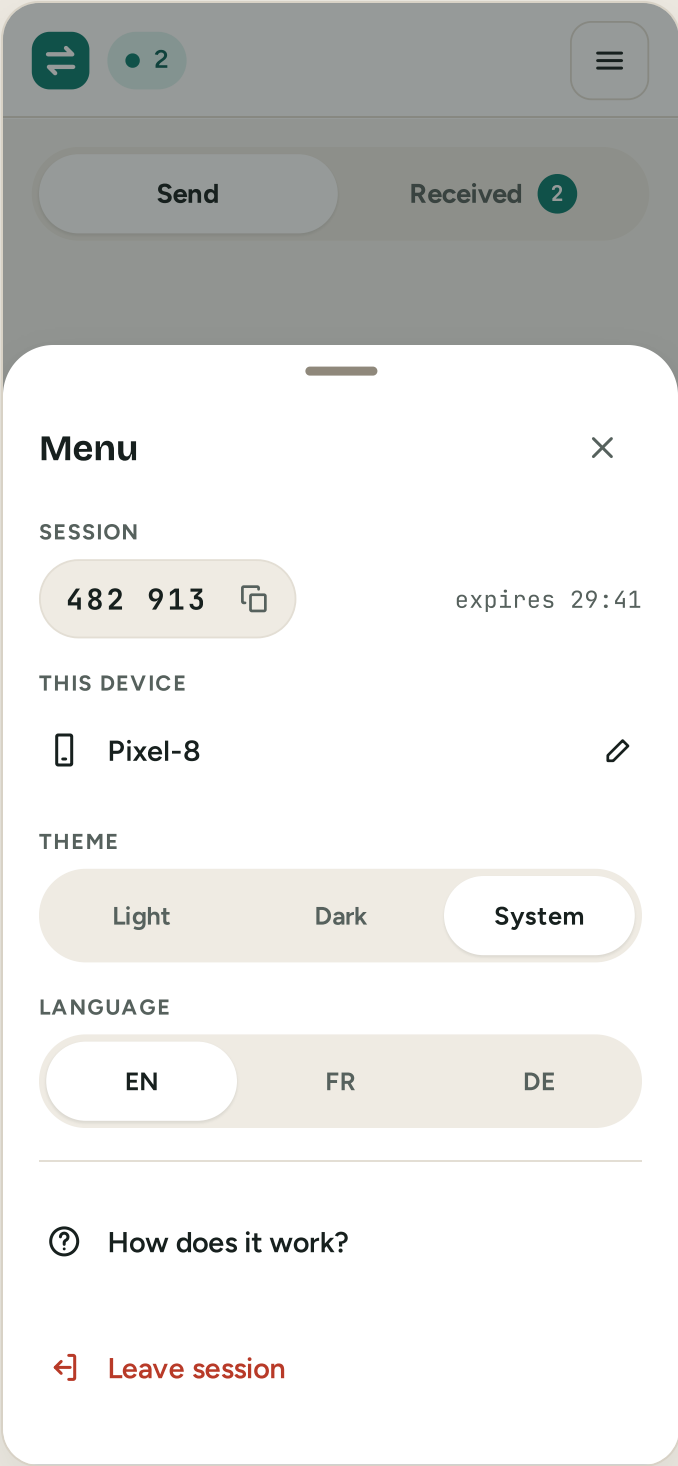

5 · Mobile room — Received tab

The session code moves to the menu

The navbar keeps what matters during a transfer. The session code, QR code, device name and leave action live in the menu.
